

FileCloud for ITAR Compliant File Sharing

Cloud-agnostic, high secure, compliant file storage and access management platform for ITAR and EAR regulated data.

WWW.GETFILECLOUD.COM

FileCloud for ITAR

FileCloud for ITAR is a highly secure file management platform that offers file storage, access and data governance. Custom-tailored specifically for organizations who deal with ITAR and EAR regulated data, it offers multi-layer data security, governance and advanced record-keeping capabilities. FileCloud for ITAR is cloud-agnostic, meaning you can self-host it on your own IT infrastructure, or choose to utilize our software services.

FileCloud for ITAR cloud service is hosted in AWS GovCloud and fully managed by U.S. citizens or permanent residents, maximizing accountability. This level of flexibility ensures that you can choose the deployment model (self-hosted or SaaS) that is most optimal for your every need.

Multi-level, 360° Data Security

FileCloud for ITAR provides multi-level, 360° data protection by bringing revolutionary Data Leak Prevention capabilities to the market.

Our simple, flexible, rule-driven Smart DLP and Classification system prevents data leaks from end users and helps organizations safeguard their ITAR/EAR regulated data.

In addition to DLP capabilities, FileCloud offers private, view-only, and time-limited file shares, as well as granular folder-/file-level access permissions for high security data.

Rule Name	WHEN (Affected User Action)	IF (Rule Expression)	THEN (DLP Action)	Active	Actions
Deny Download	DOWNLOAD	_file.pathStartsWith('/master/DLP/Download')	DENY	<input checked="" type="checkbox"/>	⚠ 🔍 ✖
Prevent Sharing with outside email domain	SHARE	_share.hasUsersFromDomain('gmail.com')	DENY	<input type="checkbox"/>	⚠ 🔍 ✖
Deny Login based on Group	LOGIN	!_user.inGroup('fired')	ALLOW	<input checked="" type="checkbox"/>	⚠ 🔍 ✖
Deny Download from network shares	DOWNLOAD	_file.pathStartsWith('/opt/partner_agreement')	DENY	<input checked="" type="checkbox"/>	⚠ 🔍 ✖
Deny Download of TOP SECRET classified documents	DOWNLOAD	_metadata.existsWithValue('Security.Classification', 'TOP SECRET')	DENY	<input checked="" type="checkbox"/>	⚠ 🔍 ✖
Prevent Sharing documents With PII data	SHARE	_metadata.existsWithValue('PII.Level', 'HIGH')	DENY	<input checked="" type="checkbox"/>	⚠ 🔍 ✖
Deny Downloads on HR folder	DOWNLOAD	_file.pathStartsWith('/master/HR')	DENY	<input checked="" type="checkbox"/>	⚠ 🔍 ✖
Deny Sharing of CC information	DOWNLOAD	_metadata.existsWithValue('CreditCard.CreditCard', 'VISA')	DENY	<input checked="" type="checkbox"/>	⚠ 🔍 ✖

Record Keeping to meet ITAR compliance

ITAR Electronic Code of Federal Regulations, Section 122.5 states “A person who is required to register must maintain records concerning the manufacture, acquisition and disposition (to include copies of all documentation on exports using exemptions and applications and licenses and their related documentation), of defense articles; of technical data; the provision of defense services; brokering activities; and information on political contributions, fees, or commissions furnished or obtained ...”.

The ITAR requires that these records be maintained for five years from the expiration of the export license or other approval. In the case of an export license exemption, this would be from the date of the transaction.

FileCloud for ITAR offers complete content lifecycle management with flexible retention and archival schedules to meet your ITAR record-keeping requirements.

Add Retention Policy

Policy Attributes

End-to-End Encryption

FileCloud offers encryption at rest and in transit using FIPS 140-2 validated cryptography modules. The files are encrypted as they are uploaded to the system.

FileCloud for ITAR (Online) offers independent and extensive customer control over encryption keys using AWS Key Management in GovCloud, while our self-hosted option offers complete control over data and encryption keys.

Security Features

Secure Access

FileCloud offers private-only, time-limited and view-only access for sensitive documents. One can prevent downloads, and configure custom sharing options with FileCloud's Smart DLP capabilities and document tags.

Data Sovereignty

Our cloud services are hosted in AWS GovCloud (which is Amazon's isolated cloud region where accounts are only granted to U.S. Persons working for U.S. organizations, maximizing accountability). FileCloud service is managed and supported from Austin, Texas by U.S.-based personnel. FileCloud can also be self-hosted by end users if they prefer that option over our cloud service.

Secure Data Governance

Simplify data governance by setting policies for automatic document lifecycle management, including file retention and archiving.

Smart Classification

FileCloud's Smart Classification Engine automatically sorts your content into logical categories within minutes. Automate the discovery of sensitive content based on simple rules that make sense to you.

Smart DLP

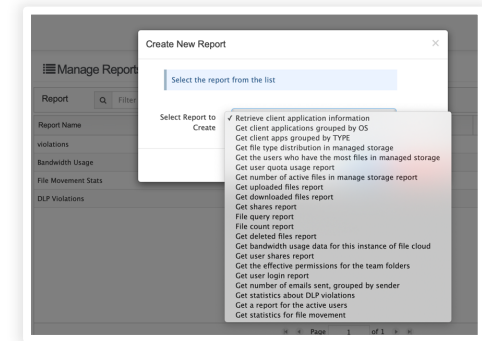

FileCloud for ITAR provides multi-level, 360° data protection by bringing revolutionary Data Leak Prevention capabilities to the market. Our simple, flexible, and rule-driven system prevents accidental data leaks from end users and protects all sensitive data.

Powerful Audit and Reports

FileCloud aims to give you the best possible audit data to satisfy ITAR compliance. With our intricate admin portal, administrators can easily filter and select levels of granularity, as well as use the "Audit" options on our admin dashboards to view the following granular data:

	WHAT	Comprehensive details on users' actions on files and directories
	WHEN	Time stamp is recorded for every action
	WHO	Information about specific users, such as IP addresses from which files were accessed
	HOW	Details about what devices, browsers and clients were used to access data

In addition to powerful auditing features, FileCloud for ITAR also offers detailed information about downloaded files, user shares, user logins, active users, DLP violations and statistics for file movement.

Features

- Cloud- Agnostic – Can be self-hosted (or) available as cloud service
- Advanced file sharing options – private, temporary and view-only shares
- Granular access permissions for file-shares
- Access via web, desktop and mobile clients (iOS and Android)
- Smart Classification, DLP capabilities to protect regulated data
- End-to-End encryption – FIPS 140-2 validated crypto module
- Supports secure NIST password guidelines
- AD, SAML-SSO Integration, Smart Card support via SSO
- 2-Factor Authentication using OTP (or) SMS
- Customer supplied encryption keys
- Detailed audit trail – what, when, who, where and how
- Device management – remote block, wipe and inventory capabilities
- Unlimited, free external users
- Document lifecycle management – retention and archival policies to meet record keeping requirements
- FileCloud for ITAR cloud service is hosted in AWS GovCloud and fully managed by U.S. citizens or permanent residents, maximizing accountability.

Recognitions

- Recognized in 2018 Gartner Magic Quadrant for Content Collaboration Platform
- Received the Gartner Peer Review Customer Choice Award for 2018 and 2019
- Net Promoter Score > 92
- Satisfied ITAR customers

Commercial

- Value pricing
- Enterprise support package included

FileCloud for ITAR Pricing

FileCloud for ITAR (Self-Hosted) deployment costs 120\$ per user per year (with a minimum 50 users are required). FileCloud for ITAR (Online, Hosted by Us) costs 240\$ per user per year (Minimum 5 Users). Both deployment options will get enterprise level support for our technical support/solution engineers.

FileCloud for ITAR Support

We offer tailored support packages for companies that deal with ITAR and EAR regulated data. Our support includes on-boarding consulting, help desk support and technical assistance via email, phone and remote desktop — whatever suits you! Our annual subscription price includes the support — you'll never need to pay for our excellent support. Comprehensive online support documentation is also available for system administrators and IT managers.

Secure Access and Authentication

Access from Anywhere

Securely access your enterprise data from anywhere using any device – without a VPN. FileCloud offers multiple ways to access your organization's files securely: web browser, a sync client, a mapped virtual drive and mobile apps.

User Authentication

Authenticate with Active Directory, or create new accounts with FileCloud. 2FA, SAML-SSO and Smart Card Authentications are supported across all clients (Web, Desktop and Mobile apps).

ITAR and EAR Compliant

FileCloud for ITAR security features comply with ITAR and EAR document security requirements, including:

- Encryption at rest and in transit using FIPS 140-2 validated cryptography.
- Complete, independent control over your content encryption keys
- Supports NIST password standards
- Multi-factor authentication
- Smart, automatic classification of documents according to sensitivity
- Smart Data Leak Prevention based on document meta data
- Control access based on IP filters
- Realtime activity-logging and reporting
- U.S.-based infrastructure operated by U.S. Citizens in the U.S.
